Council Sign-Off — Milestone 4 — Legal Greenlight for Mainnet Deployment

Project: Real-World Real Estate: Pre-Sale with Proof & Release (PropNexus) · Project Catalyst 1400106
Milestone: 4 — Pilot Testing & Mainnet Deployment + Closeout
Acceptance criterion addressed: *"legal greenlight for mainnet from counsel/notary"*
Format: Council of Experts sign-off, as defined in the project Whitepaper v1.0, *Council of Experts — Approval delivery format*

1. Reviewed artifacts

Artifact	Reference
Mainnet web application	https://propnexus-web-mainnet.onrender.com
Mainnet API	https://propnexus-api-mainnet.onrender.com
Network	Cardano mainnet
Smart contract	Aiken v1.1.21, Plutus V3, a single stage-thread validator
Script hash / minting policy	`6207ff3c19443974ee81fbf92419f20b3f45a259ea8808fe4227e6ad`
Script address	`addr1w93q0leur9zrja8ws8aljfqe7g9n73dzt84gsz87ggn7dtg3axnw0`
Reference script	`3edf75f533132835612c2d4b03e4268ad20afe0367ffb256a43c2384f3db1ed9#0`
Service wallet (signs every transaction)	`addr1vytx9747v5eq4xn740r6uy00mk3q9uk855smup9g23hun6qhk5qxw`
Source code	https://github.com/Javote/real-world-real-estate

2. Scope of what was reviewed

The platform operating on mainnet does the following, and only the following:

1. **It records cryptographic fingerprints.** It writes SHA-256 hashes of evidence files, Merkle roots of evidence bundles, and the state of each construction stage to Cardano. Each one carries a timestamp.
2. **It keeps documents and personal data off-chain.** No names, e-mail addresses, file names or internal URLs are written to the chain. On-chain metadata holds only hashes and opaque record identifiers.
3. **It does not hold, transfer or release funds.** No validator custodies value. A payment "release" in the platform is a record that a payment agreed in the purchase contract took place outside the platform, anchored by its hash. The only ADA locked on-chain is the protocol minimum (2 ADA) that accompanies each stage's thread token, paid by the platform's own service wallet. No buyer or developer funds are involved.
4. **It certifies nothing.** The platform supports exactly four statements: *this file has this hash · it was registered at this time · it declares to come from this external authority · this person attested to having reviewed it*. It does not replace public registries, building permits, deeds or any legal process.

3. Public locations and anchoring references

- Contract addresses and the full list of Milestone 4 mainnet transaction IDs: Milestone 4 evidence, item 2 (*Mainnet deployment*), verifiable on https://cardanoscan.io.
- Source code and documentation: https://github.com/Javote/real-world-real-estate.

4. Approval statement

APPROVED — the operation of the platform on Cardano mainnet, within the scope described in section 2, for the pilot of Milestone 4.

5. Perspective summary (optional)

6. Signature
