Contents	10 construction stages; 63 evidence files, each identified by its SHA-256 hash, grouped in 15 evidence bundles, each bundle anchored in its own mainnet transaction

2. Public locations and anchoring references

- Every transaction ID above, and the 15 evidence-bundle transactions, are listed in Milestone 4 evidence, item 2 (*Mainnet deployment*), and can be checked on https://cardanoscan.io.
- The signature transaction can be opened directly at https://cardanoscan.io/transaction/af744e52c9ef141e61fd8c6da9609cf6f51f57e026bc06bfe7d778f1b376ea20.

3. What I attest

Having reviewed the dossier listed above, I attest that:

1. Each evidence file I reviewed corresponds to the SHA-256 hash the dossier lists for it.
2. Each of those hashes was registered on Cardano mainnet at the time shown by its transaction.
3. I signed the dossier in the platform on 2026-10-31, and that signature is anchored in the transaction listed above.

4. What this attestation does not state

This attestation concerns the **integrity and time-ordering of the records** only. It does not certify the construction itself, its quality or its compliance with permits, the legal status of the unit, or title over it. It covers the dossier as compiled and signed at 20:22:11 UTC; records added afterwards (such as the payment record of 21:33 UTC the same day) are outside its scope.

5. Approval statement

APPROVED — the integrity of the pilot records contained in the dossier listed above.
