

4 · Security

Milestone 3 evidence, item 4: "Security review report (findings + applied fixes)." Acceptance criterion: "No open P1 security findings after remediation."

What is in this folder

File	What it is
security-review.pdf	The security review: scope, the 3 P1 findings found and closed (each with the file that fixes it and the test that proves the fix), 0 open, plus the dependency scan and static analysis results

Covered elsewhere

- **Static analysis and dependency scans run on every CI push:** Semgrep (p/security-audit + p/owasp-top-ten) and npm audit. The latest results are in the [test report](#) and its CI log.
